MAP OF THE UNITED STATES, SHOWING GEOGRAPHIC DIVISIONS.

PREFACE.

This Abstract summarizes the more important and significant statistics contained in the eleven volumes of the Fourteenth Census Reports and is designed to meet the requirements of those who desire the statistics for the census as a whole in convenient form for ready reference or who may not have access to the complete reports.

The Abstract is divided into seven parts: Population, Occupations, Agriculture, Irrigation, Drainage, Manufactures, and Mines and Quarries. This presentation conforms in general to that of the Fourteenth Census Reports. Each part contains a detailed table of contents and definitions of terms which have been given precise or special significance in census work.

Nearly all the tables presenting statistics by states also give figures for the United States as a whole and for nine groups of states, designated as geographic divisions. The states which constitute the geographic divisions are given below in their respective groupings, and the relation of the several groups can be ascertained by reference to the map on the opposite page.

NEW ENGLAND DIVISION.
- Maine.
- New Hampshire.
- Vermont.
- Massachusetts.
- Rhode Island.
- Connecticut.

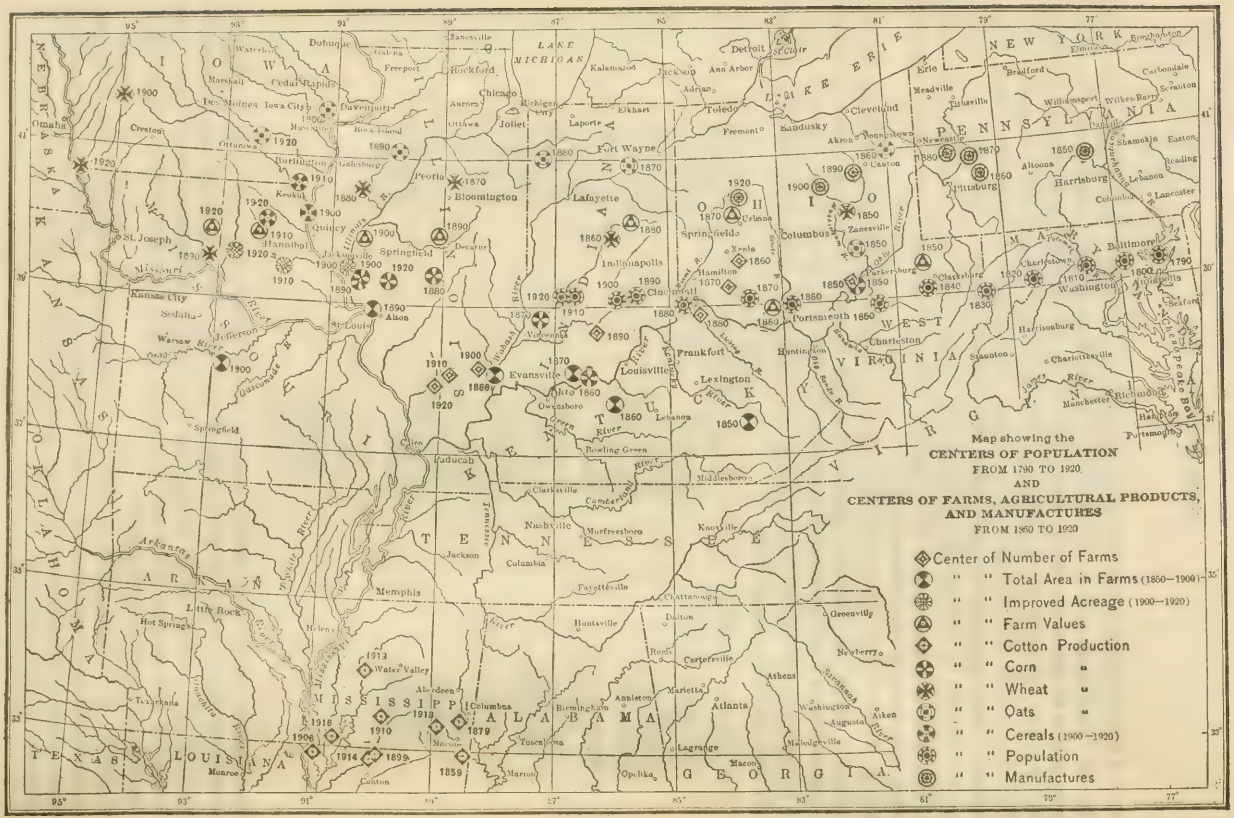
MIDDLE ATLANTIC DIVISION.
- New York.
- New Jersey.
- Pennsylvania.

EAST NORTH CENTRAL DIVISION.
- Ohio.
- Indiana.
- Illinois.
- Michigan.
- Wisconsin.

WEST NORTH CENTRAL DIVISION.
- Minnesota.
- Iowa.
- Missouri.
- North Dakota.
- South Dakota.
- Nebraska.
- Kansas.

SOUTH ATLANTIC DIVISION.
- Delaware.
- Maryland.
- District of Columbia.
- Virginia.
- West Virginia.
- North Carolina.
- South Carolina.
- Georgia.
- Florida.

EAST SOUTH CENTRAL DIVISION.
- Kentucky.
- Tennessee.
- Alabama.
- Mississippi.



WEST SOUTH CENTRAL DIVISION.
- Arkansas.
- Louisiana.
- Oklahoma.
- Texas.

MOUNTAIN DIVISION.
- Montana.
- Idaho.
- Wyoming.
- Colorado.
- New Mexico.
- Arizona.
- Utah.
- Nevada.

PACIFIC DIVISION.
- Washington.
- Oregon.
- California.

This grouping of the states facilitates the study of social, economic, and industrial phenomena with reference to their geographical aspects. In forming these groups the lines have been based partly on present and partly on historical conditions. The advantage of this geographic order lies chiefly in the ease with which conditions in contiguous states can be compared.

If more detailed information is desired in regard to any subject covered by the census or for any minor civil division (small city or village, township, etc.) not shown in this Abstract, the reader is referred to the Reports of the Fourteenth Census. A list of these reports is printed on page 2.

NOTE.—The centers for manufactures and for all crops except cotton are based on data for the year preceding the census year indicated on the map; for the centers of cotton production the exact dates are shown on the map.

POPULATION.

DEFINITIONS AND EXPLANATION OF TERMS.

Alien.—According to census classification, any foreign-born person who has taken no step toward becoming an American citizen.

Colored.—Negroes, Indians, Chinese, Japanese, and "all other." "All other" comprises Filipinos, Hindus, Koreans, Hawaiians, Malays, Siamese, Samoans, and Maoris.

Continental United States.—Comprises the 48 states and the District of Columbia.

Country of birth of foreign-born white.—Because of the many political changes which have resulted from the World War, the 1920 statistics on this subject are presented on the basis of the postwar map.

Country of origin of foreign white stock.—Based upon the country of birth of the father of a foreign-born person or the foreign parent or parents of a native. Statistics are presented on the basis of the prewar map.

Dwelling.—A dwelling, for census purposes, is a place in which one or more persons regularly sleep. It need not be a house in the usual sense of the word, but may be a hotel, boarding house, institution, or the like. A boat, a tent, a freight car, or a room in a factory, store, or office building, although occupied by only one person, is also counted as a dwelling, while, on the other hand, an entire apartment house, although containing many families, constitutes but one dwelling.

Family.—The term "family," as used in the census, signifies a group of persons, whether related by blood or not, who live together as one household, usually sharing the same table. One person living alone is counted as a family, and, on the other hand, all the occupants and employees of a hotel, boarding house, or lodging house, if that is their usual place of abode, and all the inmates of an institution, however numerous, are treated as constituting a single family.

Foreign born.—Comprises all persons not born in the United States or any of the outlying possessions or at sea under the United States flag.

Foreign parentage.—Refers to persons having both parents foreign born.

Foreign white stock.—Comprises three classes, namely, foreign-born whites, native whites of foreign parentage, and native whites of mixed parentage.

Illiterate.—The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.

Mixed parentage.—Refers to persons having one parent native and the other foreign born.

Mother tongue.—The language of customary speech in the homes of immigrants prior to immigration.

Native.—Refers to persons born in continental United States, in any of the outlying possessions, or at sea under the United States flag.

Native parentage.—Refers to persons having both parents native.

Outlying possessions.—Alaska, American Samoa, Guam, Hawaii, Panama Canal Zone, Philippine Islands, Porto Rico, and the Virgin Islands of the United States. Detailed statistics regarding the population of the outlying possessions, except the Philippine Islands and the Virgin Islands, have been published in the form of separate bulletins and as sections of Volume III of the Fourteenth Census Reports.

Philippine Islands.—Not enumerated in 1920, a census of the Philippines having been taken by the Philippine government as of December 31, 1918.

School attendance.—The Fourteenth Census inquiry was as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

Urban and rural.—All incorporated places (and all towns in Massachusetts, Rhode Island, and New Hampshire) having 2,500 inhabitants or more are treated as *urban* and the remainder of the country as *rural*.

Virgin Islands of the United States.—Not enumerated in 1920, a special census having been taken by the Census Bureau as of November 1, 1917.

TABLE 5.—POSITION OF THE CENTER OF POPULATION: 1790–1920.

[The center of population may be said to represent the center of gravity of the population. If the surface of the United States be considered as a rigid level plane without weight, capable of sustaining the population distributed thereon, individuals being assumed to be of equal weight and the plane to be supported, as on a pivotal point, at its center of gravity, the influence of each individual in maintaining the equilibrium of the plane would be directly proportional to his distance from the pivotal point or center of gravity. This is the point referred to by the term "center of population."]

[1] The total number of places of certain classes for the United States as a whole is less than the sum of the numbers shown for the individual states of the country, for the reason that each of three cities lies in two adjoining states, namely, Bristol (Virginia and Tennessee), Texarkana (Arkansas and Texas), and Union City (Indiana and Ohio), and is counted in each state. Moreover, one of these cities, Bristol, lies in two geographic divisions (South Atlantic and East South Central), and is counted in both. Each of these cities consists of two incorporated municipalities, but each is, from the statistical standpoint, one city and should be classed according to its total population. In each case that part of the population living in each state, whatever its number, is credited to the group of cities to which, according to its total population, the city belongs. Classed in this manner, Bristol fell in 1920 and 1910 in the class of cities having 10,000 to 25,000 inhabitants, and in 1900 and 1890 in the 5,000–10,000 class; Texarkana fell, in 1920, 1910, and 1900, in the 10,000–25,000 class, and in 1890 in the 5,000–10,000 class; and Union City fell at each census from 1890 to 1920 in the 2,500–5,000 class.

[2] Includes 48 places not returned separately.

[3] The number of incorporated places can not be exactly determined from the returns of the 1890 census, at which incorporated places were not distinguished from unincorporated ones, and very small places, whether incorporated or not, were not enumerated separately. It has been assumed that those places were incorporated in 1890 which were returned separately in that year and were returned in 1900 as incorporated. (See Reports of the Twelfth Census: 1900, Population, Vol. I, p. lviii.) The figures given for 1890 in this table for incorporated places having fewer than 2,500 inhabitants may, therefore, include the population of some unincorporated places and exclude that of some incorporated places.

TABLE 18.—AREA AND POPULATION OF CENTRAL CITY, METROPOLITAN DISTRICT, AND ADJACENT TERRITORY, FOR CITIES OF 200,000 INHABITANTS OR MORE: 1920 AND 1910.

[A metropolitan district has as its nucleus a city of 200,000 population or more and includes in addition those suburban areas which lie within approximately 10 miles beyond the municipal limits and in which the density of population is 150 per square mile or more. The adjacent territory is the total suburban territory, regardless of its density of population, which lies within a distance of approximately 10 miles beyond the limits of the central city.]

[Population shown for central cities for each census year does not include that of annexations made subsequently to census date, but total population given for each district for 1920 and 1910 relates to same area.]

countries" has been obtained by deducting the sum of the items for the specified countries from the United States total, which represents foreign-born white only.

[5] Switzerland included in "All other countries" in tabulation by birthplace of parents. Number of persons born in Switzerland, 104,069, also included in "All other countries" in this table.

[6] Partly estimated; total reported for "Canada—Other" was 678,442, of whom eight-tenths of 1 per cent were estimated to be nonwhites, this proportion being based upon returns of later censuses.

TABLE 116.—SCHOOL ATTENDANCE OF POPULATION 5 TO 20 YEARS OF AGE, FOR PRINCIPAL POPULATION CLASSES, BY SEX, 1850–1920, AND BY SEX AND SINGLE YEARS, 1920 AND 1910, FOR THE UNITED STATES.

[Because of variations from census to census in the manner of presenting statistics of school attendance, it is impossible to give comparative figures for any specified age group. The school-attendance percentages are, however, based on the population 5 to 20 years of age, inclusive, for the reason that the numbers of persons attending school at ages above and below these limits are insignificant. For all classes and for the white and Negro population in 1860 and 1850 the number 5 to 20 years of age has been calculated by adding estimates for age 20 to the numbers returned as in the 5–19 group; and for the Negro population in 1890 and 1880 the number in the 5–20 group was estimated on the assumption that the proportion which this group formed of the total at all ages was the same for the Negro population as for the total colored population (Negroes, Indians, Chinese, Japanese, and other nonwhites).]

OCCUPATIONS.

DEFINITIONS AND EXPLANATION OF TERMS.

Scope of inquiry.—The questions concerning occupations called for a statement of the "trade, profession, or particular kind of work done" by each person engaged in gainful labor, and for a statement of the "industry, business, or establishment in which at work." Although the enumerators were instructed to return an occupation for every person engaged in gainful labor, the occupation returns for children under 10 years of age have not been compiled. The term "gainful workers," therefore, includes all workers except women doing housework in their own homes and children working at home merely on general housework, on chores, or at odd times on other work.

The statistics as here presented relate to continental United States only, comprising the 48 states and the District of Columbia.

Classification.—The classification is occupational rather than industrial. The occupations are grouped, however, under 9 large industry or service units. Since the occupation classification used at the Fourteenth Census differs somewhat from that of the Thirteenth Census, a few occupations are here presented under different general divisions from those under which they were presented in 1910. Such transfers have changed slightly for 1910 the total number of persons in certain general divisions of occupations. Also, in 1920, occasionally an occupational designation was classified under a different occupation group from that under which it was classified in 1910. Because of these changes a moderate increase or decrease from 1910 to 1920 in the number of workers in an occupation may be apparent only and due to a difference in classification. The occupations appreciably affected by transfers of designation are confined mainly to manufacturing and transportation pursuits.

Causes of decrease.—The change in the census date from April 15 in 1910 to January 1 in 1920 doubtless had a pronounced effect on the number of workers returned as pursuing those occupations which are seasonal or largely seasonal. A comparison with the 1910 statistics for the respective agricultural pursuits indicates strongly that, especially in the case of farm laborers, the marked decrease from 1910 to 1920 probably was due in large part to an underenumeration in 1920, because in most sections of the United States agricultural work, especially the work of field laborers, is at or near its lowest ebb in January. In some measure, the decrease in farm laborers is believed to be apparent only and due to an overenumeration in 1910, especially of children engaged in this occupation. The large increase from 1910 to 1920 in the number of laborers and semiskilled operatives in fruit and vegetable canning, etc., probably resulted to a considerable extent from changing the census date to a time nearer the latest harvest season for fruits and vegetables.

The World War brought about drastic and rapid changes in many of our industries. To meet war needs new industries sprang into existence and some existing industries, because not needed to further the war efforts of the Nation, rapidly declined in importance. Along with these industrial changes went corresponding changes in the occupational activities of the people, the number of workers declining rapidly in some occupations and increasing rapidly in others. Large numbers of workers were drawn from the fields to the factories, and from factories producing nonessentials or luxuries to those producing munitions or essentials. The readjustment to a peace-time basis was only partially completed at the date of the census. Hence it is believed that many of the changes from 1910 to 1920 in the number of workers in the respective occupations may properly be ascribed in large part to the changes brought about by the World War.

Foreign parentage.—Refers to persons having both parents foreign born.

Mixed parentage.—Refers to persons having one parent native and the other foreign born.

Native.—Refers to persons born in continental United States, in any of the outlying possessions, or at sea under the United States flag.

Native parentage.—Refers to persons having both parents native.
